

Power Agent Assignment Quick Reference Guide:

What is a Power Agent?

The **Power Agent** role in PNM will give designated Provider Agents broader access to perform nearly all administrative functions. This will offer enhanced flexibility for organizations that need more than one person to have administrator capabilities. This role was developed in response to provider feedback and is designed to enhance administrator capabilities—especially for organizations managing large numbers of agents.

- If your organization has no agents, very few agents, or is satisfied with your current setup, no action is required.
- No system changes will be made to your current configuration unless you choose to utilize the new role.

Please Note:

- It is the organization's responsibility to establish and enforce internal policies for managing Provider Administrator role assignments, Power Agent designations, and related changes to ensure accuracy, accountability, and operational integrity.
- Best practices for organizational Provider Administrators include establishing clear internal policies for managing Power Agent assignments and role changes. These responsibilities rest with the organization to ensure accountability and minimize errors.
- Organizations are expected to proactively define and maintain internal processes for managing Provider Administrator roles and Power Agent assignments, ensuring changes are handled accurately and consistently to support effective oversight.

Steps:

1

Provider Administrator Dashboard: Enabling Power Agents

A new screen to provision (or assign) Power Agents is now available from the Power Agent Access Mgmt button.

- In the **Power Agent Access Management** screen, by “I would like to enable Power Agents”, you may choose ‘No’ or ‘Yes’. The system default is ‘No’ (1 admin only).
- To add Power Agents, click the bubble ‘**Yes (will require at least 1 Power Agent)**’.

- After logging into your **Provider Administrator dashboard** with your OHID, click the **Power Agent Access Mgmt** button.

1.1

- After clicking ‘Yes’, the **Power Agent Provisioning History** section will appear.
- Click **Add New**. Then, the **Add New Power Agent** box will pop up, and you will be able to select the appropriate Provider Admin from the dropdown that this new Power Agent will be assigned to after completing this step.
- When appropriate, click the box under ‘**Access Management**’ to grant the Power Agent the ability to provision other Power Agents, assign Agent roles/actions, complete a Global Admin Change, and more.
- Enter the **Power Agent’s OHID**. Then click the ‘**Add**’ button.

Note:

*Delegated Provider Administrators – May assign up to 10 Power Agents
All other Provider Administrators – May assign up to 5 Power Agents*

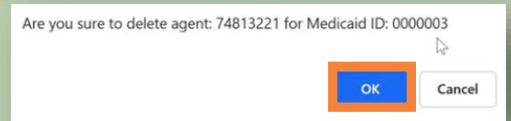

You have reached the maximum limit of 5 power agents. Provider admins cannot add more than 5.

Power Agent Assignment Quick Reference Guide:

Steps:

1.2

- Once you see the Power Agent has been added to the **Power Agent Provisioning History** section, the Provider Administrator will be able to **Edit**, **Save**, and **Deactivate** the Power Agent under the Actions column.
- The Provider Admin can also edit the **'Access Management'** role of a specific Power Agent on this screen.
- Once desired Edits have been made, click **'Save'**.
- Once you click **'Deactivate'**, a dialog box will pop up to confirm your choice. Click **OK** to proceed with deactivation of this Power Agent. The Power Agent will be removed from Power Agent Provisioning History section.

2

Power Agent Dashboard: Selecting your Provider Administrator

- Log in to your **Power Agent dashboard** with your OHID.
- If you have been provisioned by more than one Provider Administrator; you will be prompted to select your Provider Admin's OHID from the dropdown. Then click **OK**.
- Your Power Agent dashboard will display red text indicating the name and OHID of the Provider Admin you have chosen.
- If you would like to select a different Provider Admin you are assigned to, click on the **Switch Administrator** button to choose the preferred Provider Admin from the dropdown.

Note: It is possible to be provisioned as a Power Agent with one Provider Admin, and as a Provider Agent by another Provider Admin. You may toggle between these dashboards by clicking Switch Administrator as shown on the right.

2.1

Power Agent Dashboard: Enabling your own Power Agents

- If you are a Power Agent with Access Management, you may enable and provision Power Agents of your own.
- To do so, click on the **Power Agent Access Mgmt** button on your dashboard.
- Follow steps 1-1.2 of this QRG

Steps:

3

Access Management for Power Agents:

With Access Management granted, the Power Agent can view and complete any of these processes on behalf of their Provider Administrator:

- New enrollment application
- Provisioning Power Agents
- Reassign the Provider Admin of a Medicaid ID
- Complete the Global Admin Change process
- Assign Agent actions/roles

Without Access Management, the Power Agent can only:

- Manage Enrollment Information for the Medicaid IDs that are tied to their provisioning Provider Agent

Note:

Access Management can be granted or deactivated at any time under the Power Agent Provisioning History section; See step 1.2 of this QRG.

Power Agent Provisioning History

Power Agent default functionality will include the same activities that an administrator can perform, except Access Management. Access Management gives the ability to grant agent access to all agents and the ability to add power agents.
